

NEW FROM WEBCON

Twin Weber 32/36 upgrade kits for Triumph TR6

For many years, Webcon have satisfied the Triumph TR6 market with the legendary triple Weber DCOE performance kit. The Webcon DCOE kit is the ultimate performance enhancement and features a new manifold, linkage and 3 x Weber 40 DCOE carburettors.

Recently however, we have become aware of a growing number of TR6 owners who do not require an ultimate power solution, but would nevertheless like to upgrade their cars carburation. We are therefore delighted to introduce a pair of simplified Weber kits that retain the existing intake manifold yet allow the owner to install a pair of Weber 32/36 carburettors.

Available with manual choke carburettors as part number PTR202 or water auto choke carburettors as PTR203, both kits combine a healthy power increase with excellent economy.

Kits feature only genuine Spanish Weber carburettors along with custom manifold adaptors, linkage and air filters. Both are available from stock and are extremely competitively priced as follows:

PTR202 manual choke £525.00 plus vat

PTR203 auto choke £565.00 plus vat
