PRESS RELEASE

For immediate release

Webcon Universal Wasted Spark Coil Pack and mounting kit (Four cylinder applications)

Webcon have just announced a new universal Wasted Spark Coil Pack suitable for 4 cylinder distributorless applications.

This remotely mounted coil pack serves two spark plugs (in two cylinders) at the same time, using the "wasted spark" system. In this arrangement the coil generates two sparks per cycle to both the cylinders. The fuel in the cylinder that is nearing the end of its compression stroke is ignited, whereas the spark in its companion that is nearing the end of its exhaust stroke has no effect. The wasted spark system is more reliable than a single coil and distributor system and cheaper than a coil-on-plug system.

A purpose designed mounting kit is also available for use with the coil pack

Universal 4 cyl Wasted Spark Coil. Order as part number WIC062 **£58.69** including VAT
Mounting kit for above. Order as part number 9990297000 **£46.94** including VAT

In stock for immediate shipment.
