PRESS RELEASE

For immediate release

Webcon 3 Bar MAP Sensor For Ford Sierra Cosworth and Lancia Delta Integrale

A Manifold Absolute Pressure sensor provides instantaneous manifold pressure information to the engine's electronic control unit (ECU). This is necessary to calculate air density and determine the engine's air mass flow rate, which in turn is used to calculate the appropriate fuel flow.

The Magneti Marelli 3 Bar MAP sensor is required when upgrading the engine

performance of the Ford Sierra Cosworth and the Lancia Delta Integrale. The production of the genuine Magneti Marelli 3 bar Ford Cosworth MAP sensor is now becoming increasingly more costly and problematic, so Webcon have taken steps to ensure ongoing supply of this popular product by launching a quality replacement unit.

Manufactured to Webcon's legendary high quality standards their 3 bar MAP sensor - available as part number WMS014WEB - will be offered alongside the genuine Marelli product as a competitively priced alternative and will provide the consumer the choice of a genuine or a replacement sensor.

Webcon 3 Bar MAP Sensor for Ford Sierra Cosworth and Lancia Delta Integrale retails at **£62.22** incl. VAT
