PRESS RELEASE

For immediate release

MSX Crossflow Cylinder Head for BMC / British Leyland 'A' Series

Webcon now offer a Crossflow aluminium cylinder head for classic British cars that used the BMC / British Leyland 'A' Series engine. The heads are manufactured to the exacting standards expected of a Webcon product, and are up to 75% lighter than the original cast iron units thanks to the use of LM25 aluminium.

The new head is designed to flow up to 25% more efficiently, offering full crossflow characteristics.

The head features Silicon Bronze valve guides and is designed for use with Weber DCOE Carburettors or throttle bodies using the same fitment pattern.

The MSX Crossflow Bare Cylinder Head for the A Series may be ordered as part number 9900384900 and retails at **£949** plus vat.

For an assembled head, as shown, the part number is 9900384900AS priced at **£995** plus vat

For further details contact Webcon UK on +44 (0)1932 787100 or visit www.webcon.co.uk
