Webcon External Return Spring Kit

For DCOE Carburettors

Despite the carburettor internal return springs and the inclusion of return springs in most carburettor linkage kits, many race series also require the fitment of an external throttle return system.

If you've ever experienced a throttle sticking open you'll know why extra springs are required. It's an experience you won't want to repeat!

Until now, many of the products available have been of poor quality, but now Webcon have just released an external 'insurance' spring kit to add a second return spring to the Weber DCOE series of carburettors to close the throttle butterflies should the internal return springs fail.

Designed to fix to the top of the carburettor using the original top cover screws, part number LT5000 comprises Top anchor bracket, Lever arm and specially designed return spring to offer a reliable and cost effective external return spring solution.

The kit is easy to fit and provides extra peace of mind for any driver using DCOE carbs.

Webcon External Return Spring Kit for Weber DCOE carbs. Part Number LT5000
Recommended Retail Price **£17.95** plus VAT.
