PRESS RELEASE

For immediate release

MSX Crossflow Cylinder Head for MGB

Webcon now offer a range of aluminium cylinder heads for classic British cars. The heads are manufactured to the exacting standards expected of a Webcon product, and are up to 75% lighter than the original cast iron units thanks to the use of LM25 aluminium.

The latest addition to this range is the MSX Crossflow head for the MGB. The new head suffers none of the original problems (ask any MGB owner about cracked iron heads!) and is designed to flow up to 25% more efficiently, offering full crossflow characteristics.

The head features Silicon Bronze valve guides and is ideally suited for use with Weber DCOE Carburettors.

The MSX Crossflow Cylinder Head for the MGB may be ordered as Part number 9990261300 and retails at **£799** plus vat for a bare head or **£849** plus vat for an assembled head.

For further details contact Webcon UK on 01932 787100 or visit www.webcon.co.uk
