PRESS RELEASE

For immediate release

Crank Sensor Kit for Vauxhall VX220 and Opel Speedster

Webcon part number WTK001 is a complete crank sensor kit to enable the fitting of a trigger wheel and crank sensor to the Z22SE engine as fitted to the Vauxhall VX220 and Opel Speedster.

The standard signal frame utilised by GM is incompatible with many aftermarket ECUs, therefore when replacing the ECU as part of an upgrade, in many cases a new trigger wheel and crank sensor will be required.

Designed by Webcon initially as part of their highly acclaimed multi throttle Alpha Gold conversion for the VX220, demand for the crank sensor kit has been so high that the decision was taken to release the kit as a stand alone part.

All components contained in the kit are of the very highest quality and full, illustrated instructions are included.

The price of WTK001 is **£117.28** plus VAT.
