

NEWS FROM WEBCON

New super quiet Low Pressure fuel pumps

Webcon are delighted to announce the launch of two new 12v replacement electric fuel pumps for use on carburettor fuel systems. The fuel pumps will suit customers who traditionally have used the small rectangular type pumps but have found them either too noisy or too unreliable.

The pressures available are:-

WFP501 Electric Fuel Pump runs at 0.34 - 0.62 BAR (5.5-9.0 PSI)

WFP502 Electric Fuel Pump runs at 0.17 - 0.31 BAR (2.5-4.5 PSI)

Both pumps flow at 90 to 130 litres per hour and are extremely quiet and reliable in operation.

The pumps dimensions are: Length 172mm x Diameter 54mm and both are very competitively priced at just £39.78 plus vat for the WFP501 and £39.35 plus vat for the WFP502

The pumps are fully sealed units with steel casings and a zinc plated and yellow passivated finish. Each pump is supplied with attached filter, mounting bracket and Push-On 8mm O/D fuel pipe unions for both ends. Inlet and outlets are threaded to take the unions. Hose clips and 2 x 100mm lengths of fuel line are also included.
