

NEWS FROM WEBCON

New Webcon Superlight Spun Aluminium Air Horns

Webcon are delighted to announce the launch of a range of Superlight Spun Aluminium Air Horns to suit the Weber 40 and 45 DCOE range of carburettors.

Having considered all the air horn options currently on the market, it is clear that none offered the optimum combination of weight, performance and cost that we required, and that to achieve this, we would need to design our own.

Using our 35+ years experience in fuel system design and development, we went back to the drawing board and custom designed our new range of air horns to the same exacting standards the market has come to expect from Webcon products.

The new Superlight Airhorns are designed and manufactured in England, weigh an average of just 30 grams and are available in the following sizes:

40DCOE @ RRP £17.95 plus vat

16mm AH4016 26mm AH4026
39mm AH4039 55mm AH4055
75mm AH4075

45DCOE @ RRP £18.95 plus vat

16mm AH4516 26mm AH4526
39mm AH4539 55mm AH4555
75mm AH4575

The new Webcon Superlight Airhorns work especially well with our superb new Mesh Air Filters. For the 40DCOE Webcon airhorns, use mesh filter pair AFM4563, and for the 45DCOE Webcon airhorns, use mesh filter pair AFM4870.

Mesh filters are priced at just £28.50 Plus vat per pair.
