

NEW FROM WEBCON

Weber 32/36 conversion Kits for Volvo B18/B20

Dear Customer

I am delighted to advise that we have just launched two Weber carburettor kits specifically designed to fit the Volvo B18 and B20 4 cylinder OHV engines.

Supplied with a manual choke 32/36 DGV carburettor (PVO101) or with a water choke 32/36 DGAV (PVO103), both kits feature only Genuine Spanish Weber carburettors along with a custom designed intake manifold, rod throttle linkage and air filter.

These kits are of interest not only to owners of Volvo PV544, 120 (Amazon), P1800, 140, C202 and 240 series models, but also are of particular interest to the marine market as these engines were used in Volvo Penta sterndrive marine propulsion systems and have been used in boats* for many years. These engines have also been used for many years in Military and Agricultural applications such as the Volvo BM320 tractor and the Bandvagen 202.

Kits are available in stock for immediate shipment and are priced as follows:

Manual choke 32/36 DGV carburettor kit. Part No. PVO101
Water choke 32/36 DGAV kit. Part No. PVO103

Export and Trade customers, please contact Webcon for pricing details

* Please note that the kits are supplied with Rod linkages suitable for car installations.
The linkage may require slight adaptation for use in Marine and Military applications

Guarantee of Authenticity

All Weber carburettor kits produced and distributed by Webcon UK Ltd feature only genuine Weber carburettors produced in the original Spanish Weber factory.

Genuine Weber carburettors are cast with the Weber logo and are stamped
"Made in Spain"
