Genuine **Weber** carburettors are cast with the Weber logo and are stamped "Made in Spain"

Complies fully with UK MOT emission requirements

The finest replacement carburettor kit for the Suzuki SJ413 Samurai is available again.. And now its better than ever

Webcon, the World's largest supplier of Genuine Weber carburettors, is delighted to announce that kit part number 1887099000 is available once again. For many years, the Webcon Samurai kit has been the Global benchmark for reliability, economy, performance and ease of fit, but the Weber 32DGR carburettor for so long used in that kit is now no longer produced.

The good news though is that the engineers at Webcon have redesigned the kit to utilise the Weber 32/36 DGV. This has been expertly calibrated in Webcon's own in-house calibration facility to produce even more power while retaining the same class leading levels of economy and reliability. Fitting is still a breeze, and we continue to use our own, unique plenum intake system that fits perfectly to the existing air cleaner assembly. This kit **WILL NOT** suffer carb icing in the way that a cheap bolt on air filter may. And best of all, the new, improved 32/36 DGV kit is exactly the same price as the old DGR kit, so contact Webcon now for details of your local authorised stockist, and breathe new life into your Samurai
