PRESS RELEASE

For immediate release

4 Cylinder Rod Linkage

Webcon are pleased to announce a new rod linkage that will enable twin Weber DCOE carburettors to be fitted to a 4 cylinder engine to replace the original single carburettor.

The kit features 44cm length of 5/16 stainless bar and a pair of top quality 5/16 rose joints. Also included are 3 actuating levers - 2 for the carbs and 1 to interface with the original throttle linkage. Actuation is then achieved via stainless adjustable drop rods and ball end carburettor throttle levers.

Custom made aluminium lock tops are provided to prevent the bar from moving.

The kit may be ordered as part number LP5400 and it retails at **£64.95** plus VAT.

For further details contact Webcon UK on +44 (0)1932 787100 or visit www.webcon.co.uk
